

Conditional Formatting in Excel

- ▶ Learn how to visualize and analyze data using Excel's Conditional Formatting (Home Tab).

What is Conditional Formatting?

- ▶ Automatically changes cell appearance based on rules.
- ▶ Example: Scores above 80 turn green.
- ▶ Visual: Cells change color instantly.

Key Idea

- ▶ Excel checks conditions and applies formatting automatically.
- ▶ No manual coloring needed.

Why Use It?

- ▶ Improves readability and highlights trends.
- ▶ Example: Quickly spot highest sales.

Where to Find It

- ▶ Home Tab → Conditional Formatting.
- ▶ Dropdown menu appears with options.

Menu Overview

- ▶ Options include:
- ▶ Highlight Rules, Top/Bottom, Data Bars, Color Scales, Icon Sets.

Highlight Cells Rules

- ▶ Used for basic comparisons like $>$, $<$, $=$.
- ▶ Visual: Cells filled with color.

Greater Than Rule

- ▶ Highlights values above a number.
- ▶ Example: >1000 .
- ▶ Visual: High values turn green.

Less Than Rule

- ▶ Highlights values below a number.
- ▶ Example: <50 .
- ▶ Visual: Low values turn red.

Between Rule

- ▶ Highlights values in a range.
- ▶ Example: 60–80.
- ▶ Visual: Mid-range colored.

Equal To Rule

- ▶ Highlights exact matches.
- ▶ Example: $=0$.
- ▶ Visual: Matching cells highlighted.

Text That Contains

- ▶ Highlights cells with specific text.
- ▶ Example: 'Yes'.
- ▶ Visual: Text cells colored.

Date Occurring

- ▶ Highlights dates like today, yesterday.
- ▶ Visual: Relevant dates stand out.

Duplicate Values

- ▶ Highlights repeated or unique values.
- ▶ Visual: Duplicates share color.

Top/Bottom Rules

- ▶ Find highest and lowest values quickly.

Top Items

- ▶ Highlights top values.
- ▶ Example: Top 10 sales.

Bottom Items

- ▶ Highlights lowest values.
- ▶ Example: Bottom 5 scores.

Top Percentage

- ▶ Highlights top %.
- ▶ Example: Top 10% performers.

Bottom Percentage

- ▶ Highlights lowest %.
- ▶ Visual: Weak areas visible.

Above Average

- ▶ Highlights values above average.
- ▶ Visual: Strong performers stand out.

Below Average

- ▶ Highlights below average values.
- ▶ Visual: Needs improvement.

Data Bars Overview

- ▶ Bars inside cells show value size.

Data Bars Example

- ▶ Longer bar = higher value.
- ▶ Useful for comparisons.

Data Bars Types

- ▶ Gradient fill and solid fill bars.

Color Scales Overview

- ▶ Uses colors to represent value ranges.

2-Color Scale

- ▶ Low → High (Red → Green).

3-Color Scale

- ▶ Low, Medium, High (Red, Yellow, Green).

Color Scale Example

- ▶ Grades visualization.
- ▶ Visual: Smooth color transition.

Icon Sets Overview

- ▶ Icons show performance levels.

Icon Types

- ▶ Arrows, traffic lights, stars, flags.

How Icons Work

- ▶ Values grouped into categories.
- ▶ Each group gets an icon.

Icon Example

- ▶ Green = high, Yellow = medium, Red = low.

Custom Rules

- ▶ Use formulas.
- ▶ Example: `=A2>B2` highlights rows.

Managing Rules

- ▶ Edit, delete, reorder rules.
- ▶ Visual: Rules Manager window.

Best Practices

- ▶ Keep it simple.
- ▶ Use few colors.
- ▶ Be consistent.

Common Mistakes

- ▶ Too many rules.
- ▶ Confusing colors.

Summary

- ▶ Conditional Formatting makes data clear and visual.
